COVID-19 Tracking

This overview will present how to manage the COVID-19 status of a child or a foster home. The elements of COVID-19 status include the following:

- COVID-19 exposure
- COVID-19 testing and test results
- COVID-19 quarantine
- Recovery

This overview will describe the following:
- Where to find the COVID-19 Status
- The COVID-19 workspace for a child or Foster parent
- How to identify exposure or clear exposure
- How to track testing and test results
- How to track quarantine begin and end
- How to identify COVID-19 recovery

FIRST: Login In

COVID-19 Tracking

After you login in you will be presented with either 1 of two landing pages:

- Your Case Manager MyDash
- The Main Menu

From the Main Menu you can access any of the following in order to get to the COVID-19 workspace:
- Lead Agency Provider Listing
- FaceSheet (not shown here)

All three have a COVID-19 status column. This column is represented by a person icon.

Click the person icon for the Child or Foster Parent that you would like to manage.

COVID-19 Tracking

The Work Space is where all COVID-19 status is managed. The following are the sections that are included on the work space:

- Child Detail
- Exposure Status and Dates
- Cleared status and Dates
- Quarantine status w/ Begin and End dates
- Time line of all COVID-19 status
- Test Dates and Results
- Recovered dates

The Process Begins by clicking the button to document exposure:
This will present the exposure form.

COVID-19 Tracking

This form is a working form, which means that once submitted, you can click it again from the workspace and update the exposure, quarantine and cleared status.

To start, enter the date exposed with supporting detail in the comments section.

Covid Exposure

Details

Date Exposed:	09/04/2020
Comments:	It was reported that a student in ▓▓▓▓ class tested positive for COVID-19. Therefore Michaela is exposed and will be tested this week.
Date Quarantine Begin:	
Quarantine Comments:	
Date Quarantine End:	
Date Cleared (If never tested positive):	
Cleared Comments:	

If the child/home is cleared of exposure, the date cleared and comments are entered on this form.

If the child/home is directed to quarantine, the date begin and comments are entered on this form.

If the child/home was directed to quarantine and the quarantine has ended, the end date and comments are entered on this form.

NOTE: Testing status is managed from a different form.

COVID-19 Tracking

After entering or updating the exposure details, the case workspace will be updated as shown here.

- The child detail highlights the overall status.
- The exposure section will present the dates and comments.
- The Timeline will show the COVID-19 status in chronological order.

COVID-19 Tracking

This form is a working form, which means that once submitted, you can click it again from the workspace and update the test, test results and recovery details.

To start, enter the date the test took place with the respective comments. For example, the location of the test, type of test and perhaps the expected date of results.

Covid Test Results

Details

Test Date:	09/04/2020
Test Comments:	▓▓▓▓▓ was tested.
Results Date:	09/04/2020
Results:	◉ Positive ○ Negative
Results Comments:	Test results were positive and due to no symptoms, the doctor suggested she quarantine at home with limited interaction with others in the house..
Recovered Date:	
Recovered Comments:	

When the test results are known, the results date, the result itself and support detail are entered on this form.

If the child has recovered from testing positive, the recovered date and recover comments are entered on this form.

NOTE: If a quarantine is required because of positive test results, the quarantine is managed from a different form.

COVID-19 Tracking

EXAMPLE of complete timeline.

You can see the time line section shows the exposure, a COVID-19 test, Positive test results, quarantine, a COVID-19 Re-Test, followed by Negative Results, a recovery status and the end of the quarantine.

Each section on the workspace has the individual status.

The two forms to consider are:

- Exposure (which also has quarantine)

- Test (which also has recovery)
